On Thursday, January 25, 2007, homeless providers throughout Vermont will be coordinating and conducting the annual Point-In-Time count of the state's homeless population. During this count, NO personally identifiable information will be collected. All information will be aggregated and generic reports will be prepared. These reports will be used to: identify the housing and services needs of the homeless population; inform policy; and determine funding needs and priorities.

Please help make this a successful count and a useful resource.
