

Energy Efficiency & Reducing Carbon Footprint

A Panel Discussion

**Steve O'Malley, Project Manager
Business Environmental Services
Efficiency Vermont**

**Harold Garabedian, Assistant Director
Air Pollution Control Division
VT Department of Environmental Conservation**

Energy efficiency in transportation and facilities has a tremendous potential to produce environmental benefits and economic savings. Efficiency is clearly necessary to reduce our carbon footprint and to reduce our dependency of fossil fuels, and these reductions will ultimately result in cost savings during these challenging economic times. Harold Garabedian is an expert on vehicle efficiency and alternate fuels and Steve O'Malley is an expert on commercial and residential energy efficiency. They will lead a discussion on practical alternatives that are available now or will be in the foreseeable future.

Thursday, March 26th, 2009
