

About this Partial Archive of SCIENCE for the PEOPLE

Assembled November 2011 by Charles Schwartz,
Professor Emeritus of Physics at the University of California, Berkeley

Presently posted at <http://socrates.berkeley.edu/~schwartz/SftP/Contents.html>
and here made available as a CD for others to make publicly accessible.

The file “Contents.html” is the starting page.

The main pages are html, which may be modified if you wish to customize or expand this archive. Please acknowledge this original source if you make any changes.

The Magazine Archive is a set of 109 pdf files that have been scanned* so they are readable (and downloadable) but not searchable. The Composite Tables of Contents is a searchable listing, with links to each individual issue of the magazine.

*technical details of the scanning:

On an Epson Stylus CX4200; v. 3.02A (TWAIN compatible) with Mac OSX 10.4
Software settings under Home Mode:

Document Type: Text/Line Art; output format: PDF

Inside pages: Black & White; Destination: Other, 300 dpi

Covers (front and back): Color; Destination: Screen/Web, 96 dpi
